# IT'S TIME TO REFORM YOUR REHABILITATION PROGRAMS

Around the world, rates of recidivism are sobering, with more than half of inmates returning to prison within five years. Honeywell Secure PC is designed to tackle this challenge.

## WHAT IS HONEYWELL SECURE PC

The Honeywell prisoner interactive learning system (PILS) lets inmates securely access e-learning content, authorised TV services, e-visits and more—in their cells or a supervised environment. This technology empowers them to further their education and prepare for re-entry into society.

## WHY PRISONER EDUCATION IS ESSENTIAL TO REDUCING RECIDIVISM

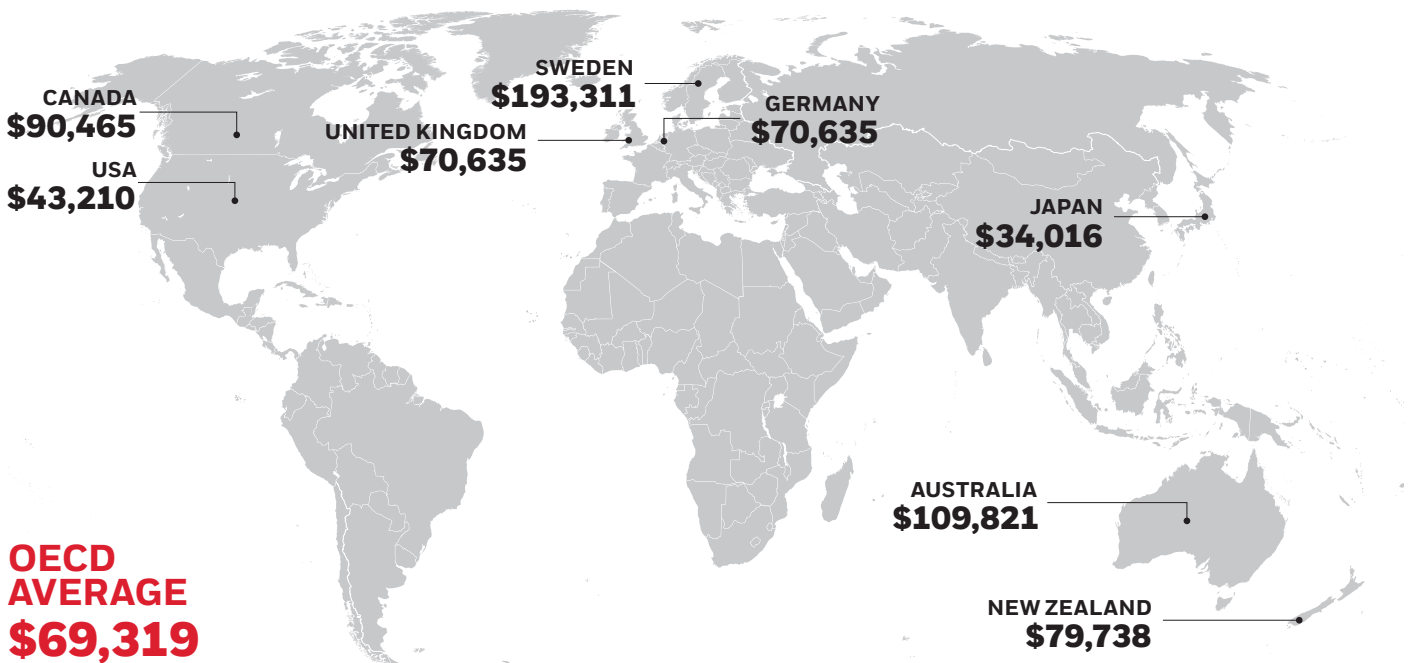

Research has shown that education is one of the primary ways to help reduce recidivism. Many offenders are from low socioeconomic backgrounds with low levels of education. As a result, they find it hard to gain meaningful employment after they are released from prison. They also find it hard to cope in our increasingly digital world due to limited skills with computers and digital technology.

Now you can close this gap with Honeywell Secure PC, increasing both prisoner education levels and rehabilitation outcomes.

The cost of implementing technology to tackle rehabilitation and recidivism is a small fraction of the cost of incarcerating repeat offenders.

## THE COST OF INCARCERATION

Cost per inmate per year in Australian dollars (\$AUD)

# HOW SECURE PC CAN HELP

## Prisoner Education and Rehabilitation

E-learning content

Authorised streaming TV services

Controlled video conferencing and email

Prisoner services kiosks for e-health, visit scheduling and more

## Centralised Monitoring and Control

Can integrate with your Prisoner Movement and Identification System (PMIS)

Secure PC puts the focus on security. It not only keeps the system safe from unintended use and external threats, it also enables centralised monitoring and control using the platform's management console.

## Reduced Custodial Staff Workload

Giving prisoners the ability to self-manage approved activities reduces the burden on your custodial staff. Instead of having to facilitate all prisoner movement and actions, Secure PC frees your staff to focus on more value-added activities.

## Prisoner Connectivity

Keep prisoners connected with controlled and monitored e-visits and e-court attendance.

## DO WE HAVE TO INSTALL SECURE PC IN EVERY CELL?

No, the Secure PC platform is flexible to fit your needs. You can deploy any mix of form factors:

- In-cell thin client desktop
- Prisoner communications kiosk
- Thin client desktop for supervised areas, such as classrooms
- Mobile tablet

*The Secure PC platform engages, educates and empowers inmates to take an active role in their rehabilitation. This approach helps normalise their environment and better equips them to assimilate back into society, helping reduce recidivism.*

# WHY HONEYWELL?

With Honeywell, you're not limited to a single product—or even a single solution. After 30+ years helping more than 75 justice and correctional facility customers around the world, you can rely on us for unrivalled domain and technology expertise.

In addition to a Secure PC solution that's customised for your facility, our technology focus includes:

**PHYSICAL SECURITY MANAGEMENT SYSTEMS**

**WHOLE-OF-LIFE TECHNOLOGY PARTNER**

**SECURITY ACCESS CONTROL**

**MOBILE DURESS ALARMS**

**SURVEILLANCE**

**DRY FIRE**

**BUILDING MANAGEMENT SYSTEMS**

**INFORMATION CONVERGED TECHNOLOGY**

**10–30%**  
reduction in  
**energy costs**

**PROVEN INTEGRATION PLATFORM**  
provider for  
critical infrastructure

**SOLUTIONS AND SERVICES**  
to help reduce  
recidivism

**LOWER STAFF TURNOVER**  
due to faster training  
and upskilling

**10–15%**  
lower **lifecycle costs**

**75+**  
Justice &  
Correctional  
facilities globally

**UNRIVALLED DOMAIN EXPERTISE**

30+ years  
Global and local  
reporting  
Technicians &  
software engineers  
around the globe

**ENHANCED SAFETY**  
and security

**5,000+**  
Critical infrastructure  
locations benefit from  
Honeywell's industrial  
cybersecurity solutions

**REDUCTION OF ONE FULL-TIME EMPLOYEE**  
in control room\*

**REDUCE RISK**  
Holistic approach  
to critical asset  
management, reducing  
risks and costs

\* If moving from unintegrated point solutions to Honeywell PSIM. Results are not necessarily typical and are based on Honeywell "before and after" analysis at selected customer sites. Such analysis compared site performance before deployment of Honeywell solutions to post-deployment performance, without controlling for other factors that may have affected results. Your results may vary.
