Announcement: New CLSS-Enabled 5G LTE-M Commercial Fire Alarm Communicators

July 2022

Honeywell Fire is excited to announce the availability of two new models of commercial fire alarm communicators in partnership with Telguard® and turbocharged by Honeywell Forge. The Honeywell HW-TG7FS Series of 5G LTE-M fire communicators offer all the same features as Telguard’s TG-7FS models with the added functionality of Honeywell’s powerful Connected Life Safety Services (CLSS) cloud solutions and directly replace the previous HW-TG7L Series LTE models which have now been discontinued.

Communicator Features

- Transmits alarm signals from the fire panel over the digital cellular network to the designated monitoring station
- Certified for use on AT&T and Verizon 5G LTE-M networks
- Compliant with NFPA 72 2019 and earlier editions
- Sole, primary, or backup path communications
- 5- or 60-minute supervision modes (180 seconds is available in Canada)
- Supports Contact ID, SIA2, pulse (3x1, 4x2), modem 1le, 1lla², and DMP
- Transmits fire alarm signals through the Telguard Communication Center
- Available for use in the U.S. (both models) and Canada (AT&T model only)

Software Features*

- **CLSS Site Manager** provides a “bird’s eye” view of all your accounts and real-time information on event generation so you can diagnose before dispatch. Reduce unnecessary trips & improve your first-time fix rate.
- **CLSS Facility Manager** provides your end users with event alerts via browser or mobile app and access to asset information across multiple sites.
- Included at no charge with the purchase of Telguard monthly service!

**Only available when using Contact ID reporting format*

MODEL NO.	DESCRIPTION	REPLACES
HW-TG7FS-A	CLSS-ENABLED 5G LTE-M FIRE ALARM COMMUNICATOR (AT&T)	HW-TG7LAF02
HW-TG7FS-V	CLSS-ENABLED 5G LTE-M FIRE ALARM COMMUNICATOR (VERIZON)	HW-TG7LVF02
