

Product Announcement: New Addressable Fire Alarm Control Panels with Built-In Cellular Communicator and CLSS Cloud Connectivity

June 2023

Fire-Lite Alarms is pleased to announce the latest addition to our addressable fire alarm control panel (FACP) family designed to give fire safety professionals more options for protecting small to medium-sized buildings. The Fire-Lite ES-XP Series, including the ES-50XP and ES-200XP, offers a complete turn-key fire safety solution by combining the dependable ES Series of addressable FACPs with an integrated dual-path (cellular/IP) and dual-SIM (AT&T/Verizon) 5G LTE-M CLSS Pathway Pro communicator. This combined solution reduces installation and labor costs, enables faster and more reliable central station reporting and provides complete line of site monitoring plus access to automated test and inspection reporting through Honeywell’s Connected Life Safety Services (CLSS) cloud solutions.

As an integrated communicator, the CLSS Pathway Pro can transmit signals to central stations up to 40 seconds faster than legacy dialer capture methods primarily used in the market. In addition, the dual-path (cellular/IP) and dual-SIM (AT&T/Verizon) connectivity options of the CLSS Pathway Pro provide exceptional redundancy for increased reliability and peace of mind with every installation.

The CLSS Pathway Pro also provides access to Honeywell’s cloud-based software tools including:

- **CLSS CheckPoint** allows system integrators to deliver professional test reports before leaving a customer’s site
- **CLSS Site Manager** provides a “bird’s eye” view of all accounts and real-time information on event generation so system integrators can diagnose before dispatch reducing unnecessary trips and improving first-time fix rate
- **CLSS Facility Manager** provides end users with event alerts via mobile app and access to asset information across multiple sites to ensure all facilities are operating effectively and meeting compliance requirements

MODEL NO.	DESCRIPTION
ES-50XP	50-POINT ADDRESSABLE FACP WITH CLSS PATHWAY PRO IP/CELL COMMUNICATOR
ES-200XP	198-POINT ADDRESSABLE FACP WITH CLSS PATHWAY PRO IP/CELL COMMUNICATOR
