Product Announcement: New CLSS Pathway Commercial Fire Alarm Communicator

February 2022

Honeywell Fire is pleased to announce a new addition to our lineup of fire alarm communicators with the launch of the CLSS Pathway (HW-AV-LTE-M). The CLSS Pathway includes a dual SIM to support both AT&T and Verizon networks, operates on the LTE-M (5G-ready) network and combines dialer capture functionality with the powerful capabilities of Honeywell's Connected Life Safety Services (CLSS) cloud solutions. With industry leading hardware and software features, the CLSS Pathway offers the latest in alarm communications technology for the fire industry and is available to order now!

Hardware Features:

- Dual SIM automatically picks from AT&T or Verizon networks for ultimate redundancy and reliability
- LTE-CAT-M1 network is 5G-ready for deep signal penetration inside buildings
- Meets UL 864 requirements for sole, primary or backup path communications
- Universal fire alarm control panel (FACP) compatibility and direct power from 24 volt FACP
- Introductory offer includes first year of cellular/IP service included in purchase price
- Enclosure kit sold separately (HW-AV-ENC)

Software Features:

- **CLSS Site Manager** provides a “bird’s eye” view of all your accounts and real-time information on event generation so you can diagnose before dispatch. Reduce unnecessary trips & improve your first-time fix rate.
- **CLSS Facility Manager** provides your end users with event alerts via browser or mobile app and access to asset information across multiple sites.
- **CLSS CheckPoint** allows you to deliver professional test reports before leaving your customer’s site.

MODEL NO.	DESCRIPTION
