# MAKE HOTEL HEALTH A KEY PERFORMANCE INDICATOR

Even as hotels face unprecedented challenges, we can build on the dynamics that remain true: People still need to travel, vacations still refresh us, and your hotel can still comfort guests – but now, guests are seeking hotels that also help protect them.

So as travel revives, you can operate at higher capacity by turning rooms faster and showing guests why they're safer.

## KNOW IT'S SAFER

A Healthier Hotel starts with cleaner air. Our in-room HEPA air purifiers enable you to efficiently clean the air in each room, keeping guests safer and helping return rooms to service sooner.

Build on this foundation with HEPA and ion filtration for your overall HVAC system, plus smart HVAC capabilities such as ventilation that's automated by indoor air quality (IAQ) sensors.

And with UV-C cleaning, you can quickly clean surfaces between uses without harsh chemicals, in rooms or throughout your hotel.

## SHOW IT'S SAFER

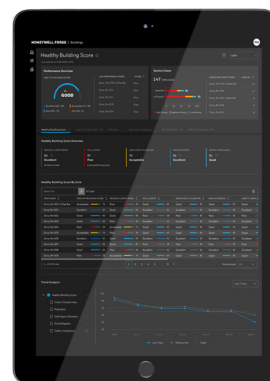

Much like staff publicly using masks and hand sanitizer, an unobtrusive yet visible air purifier in each room shows guests that you take their health seriously.

Our Healthy Buildings solutions also include a dashboard with a real-time Healthy Buildings Score that can be displayed on public screens and online, reassuring current and prospective guests.

And with intelligent video analytics, you can quickly scan employees or guests to detect proper mask use or prescreen for an elevated body temperature.

## KEEP IT SAFER TOMORROW

Our connected guestroom air purifiers can integrate with the INNCOM INNcontrol 5 Energy Management System (IC5 EMS) to report runtimes, filter-change timers, and assess whether the room has had the air turned over.

Dashboards for IC5 and Healthy Buildings can also provide KPI-tracking and analytics to help you monitor, respond to, and plan, day to day and for the longer term.

With the capabilities to create safer spaces and the data to show it, you can reassure guests that your hotel remains their oasis of comfort away from home – and as occupancy grows, you can sustain that growth with the flexibility to turn rooms faster.

**SAFETY IS THE NEW COMFORT**

Our Healthy Buildings solutions are a set of modular capabilities to help make your hotel measurably safer without a costly, cumbersome overhaul.

Using the same integrated capabilities that Honeywell customers have trusted for decades, we start with your existing hotel, HVAC, and INNCOM systems and then integrate what you need, such as automated air cleaning, safety monitoring, cloud analytics, or even personal protective equipment (PPE).

So let’s build on the comfort you’re known for – and make it safer. That’s a Honeywell Healthier Hotel.

**A HEALTHIER HOTEL BEGINS WITH A PLAN**

| KNOW IT’S SAFER                                   | SHOW IT’S SAFER                                | KEEP IT SAFER  | BUILD OCCUPANCY  |
|---|--|--|--|
| HEPA filtration – in-room and in your HVAC system | Portable in-room air purifiers                 | Integrate in-room purifiers with IC5 EMS software for monitoring and control | Data and tools to show guests – online, on-site, and in-room that your hotel is measurably safer |
| UV-C surface cleaning                             | Public dashboards with Healthy Buildings Score | KPIs and analytics from IC5 & Healthy Buildings dashboards                   | Return rooms to service faster with proactive air and surface cleaning                           |
| IAQ sensing and automated ventilation             | Prescreen for body temperature and mask use    |  |  |
