SECURE YOUR DATA, PEOPLE & PROCESSES

BUILD IN CYBER RESILIENCE

Your building's operational technology systems have become more and more connected. The security of your operating environment may need an extra layer to control cyber risks.

ALERTON

WHY TARGET OT SYSTEMS?

Honeywell builds cybersecurity into every product, but as building operations have become more connected, sophisticated and cloud-based, your surface of vulnerability to malicious attacks has grown. There are plenty of scare tactics out there, but this is an invitation to continue to ensure uninterrupted operations by staying ahead of bad actors and hardening your defenses.

Operational Technology systems tend to have longer life spans than IT systems. This can mean legacy software, unsupported by IT and therefore outside the visibility of current cybersecurity precautions.

Our layered solution includes advanced detection at every level as well as encryption that prevents bad actors from trying to access IT systems through OT vulnerabilities.

ORDERING INFORMATION

PART NUMBER	DESCRIPTION
ADVANCED ENDPOINT SECURITY	
CYB-HTDP-15-1Y	Honeywell Advanced Endpoint Security - 1 Year Term
REMOTE MANAGEMENT	
CYB-HRMSTD-WRK	Standard HRM Monitored Workstation - 1 Year Term
CYB-HRMSTD-SRV	Standard HRM Monitored Server/Virtual Host - 1 Year Term
CYB-HRMSTD-NSW	Standard HRM Monitored Network Switch/Router - 1 Year Term
CYB-HRMSTD-NFW	Standard HRM Monitored Network Firewall - 1 Year Term
THREAT DEFENCE PLATFORM	
CYB-HTDP-15-1Y	Protected IP Up to 15 - 1 Year Term
CYB-HTDP-30-1Y	Protected IP Up to 30 - 1 Year Term
CYB-HTDP-45-1Y	Protected IP Up to 45 - 1 Year Term
CYB-HTDP-60-1Y	Protected IP Up to 60 - 1 Year Term
HTDP-VM-S-1Y	Virtual HTDP Sensor - 1 Year Term
HTDP-HW-S-1Y	Physical HTDP Sensor - 1 Year Term
HTDP-Cloud-SaaS-1Y	On-Cloud HTDP - 1 Year Term
HTDP-Cloud-SaaS-3Y	On-Cloud HTDP - 3 Year Term
HTDP-Cloud-SaaS-5Y	On-Cloud HTDP - 5 Year Term
HTDP-HW-A-1Y	On-Prem Physical HTDP - 1 Year Term
HTDP-HW-A-3Y	On-Prem Physical HTDP - 3 Year Term
HTDP-HW-A-5Y	On-Prem Physical HTDP - 5 Year Term

HONEYWELL ADVANCED ENDPOINT SECURITY

Using an innovative deep learning framework, HAES (Powered by Instinct) offers near real-time threat prevention with multi-layer protection against known and unknown threats. It can be applied on endpoints such as mobile devices, desktops, servers, and workstations within virtually any operating system.

HONEYWELL REMOTE MANAGEMENT

The HRM platform continuously monitors and analyzes your critical OT servers, workstations, virtual machines, and applications to help alert you regarding potential issues. And it provides guidance to help you prioritize maintenance while enhancing value and minimized disruption.

HONEYWELL THREAT DEFENCE PLATFORM

Flexible and easy to deploy, HTDP uses advanced detection to quickly and efficiently distribute deception techniques at scale, on-premises or in the cloud. The solution requires no modification to the customer's environment and can be deployed in as little as a day.
