

MAKE COMPLIANCE YOUR HEALTHY BUILDING ADVANTAGE

Compliance is a significant factor when it comes to sustaining healthier buildings. It can help drive business continuity, minimize risk, decrease cost and reassure occupants that a building is safer. Policies and standard operating procedures will also evolve as we learn and adapt in the new normal.

HEALTHY BUILDINGS ANALYTICS

Honeywell

CREDIBLE DATA THAT REASSURES

Occupants will no longer take for granted that a building environment is safer and healthier. They have new concerns, maybe even fears, and will need reassurance supported by credible data.^{1,2} A healthy building reflects a holistic view of the building environment and the people who use it. That means indoor air quality that promotes health, safety and security protocols to manage and minimize risk.

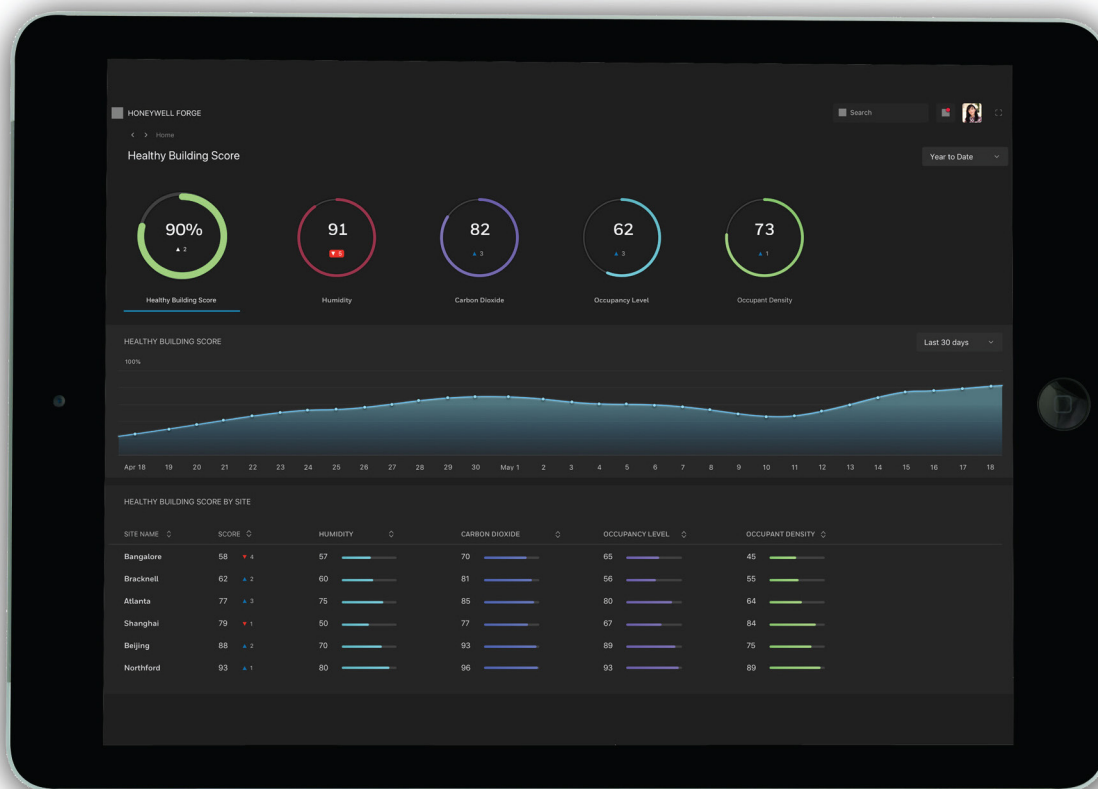

Honeywell's #HealthyBuildings Score analytics provide real-time alerts to building owners and operators, so they can quickly address non-compliance issues or deal with potential exposure-related incidents and communicate building health metrics to occupants.

CONTROL COMPLIANCE

Building owners can gain more control over critical health, safety and security factors to sustain compliance with changing building standards, safety guidelines, government-issued regulations and a company's risk management policies. Real-time and actionable analytics give building owners the ability to minimize risk as they adapt to an evolving new normal.

REASSURE OCCUPANTS

Reassure occupants with visible, transparent data on the health of the building. A curated, simplified view of the #HealthyBuildings Score can be shared anytime and anywhere via a mobile app. A real-time dashboard can also be displayed via monitors across a building site such as the entrance lobby, elevators or cafeteria.

DEMONSTRATE THAT YOUR BUILDING IS SAFER AND KEEP IT THAT WAY

Give your occupants tangible evidence demonstrating why they can be confident about their safety and health as they use your building. We can help you give occupants insight into your building's operations that they've never had before, demonstrating how risk is minimized. Healthy Building outcomes are powered by Honeywell Forge and monitored via the #HealthyBuildings score.

ANALYTICS

Use smart edge analytics and software tools to monitor your building management system 24/7 to gain insights into indoor air quality, occupant behavior and non-compliance issues.

SECURITY & PRIVACY BY DESIGN

Honeywell Healthy Building solutions features software and proprietary hardware that is built with a secure - and privacy-by-design approach. It complies with local regulations and data privacy laws.

BUSINESS CONTINUITY AND COMPLIANCE ANALYTICS

#HealthyBuildings analytics dashboards and mobile app

Real-time alerts and trend reporting

Proactive occupant and visitor communication

Remote monitoring to support business continuity and OPEX management through downtime

Scalable architecture for single building or enterprise solutions that can be deployed on-premise and via the cloud

Energy and other cost savings metrics

Flexible financing solutions to accelerate your return to work

KPIS TO KEEP YOUR BUILDING ON TRACK

- Indoor air quality
- Airborne pathogen risks
- Occupancy levels
- Flow management
- Personal Protective Equipment (PPE) compliance
- Thermal screening
- Social distancing compliance
- Sanitation processes
