

HONEYWELL INCIDENT DOSSIER

Streamline your investigations,
amplify your results.

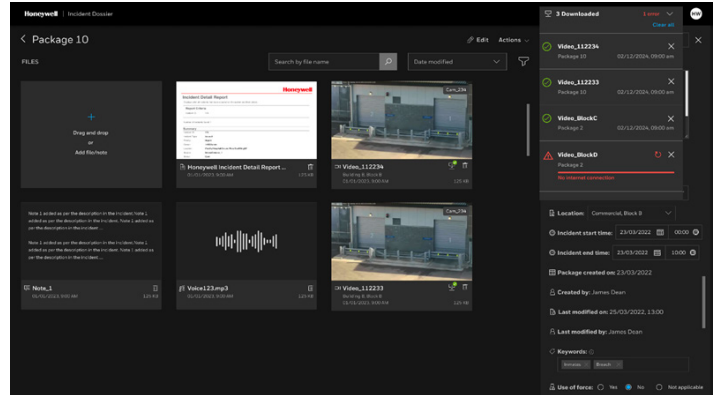

Honeywell

Honeywell Enterprise Buildings Integrator (EBI) system now features Incident Dossier capabilities, enabling a better transition from evidence gathering to long-term storage and analysis. By bridging the gap between initial investigation and ongoing evidence management, Incident Dossier helps enhance your evidence management process.

ADD FILES FROM ANY SOURCE

Incident Dossier isn't limited to just your EBI and Digital Video Manager (DVM) system data. It is designed to accept files from virtually any source – whether you're working with smartphone recordings, security camera footage or data and reports from specialized equipment. This flexibility helps enable you to easily package your incident dossier no matter where the evidence source.

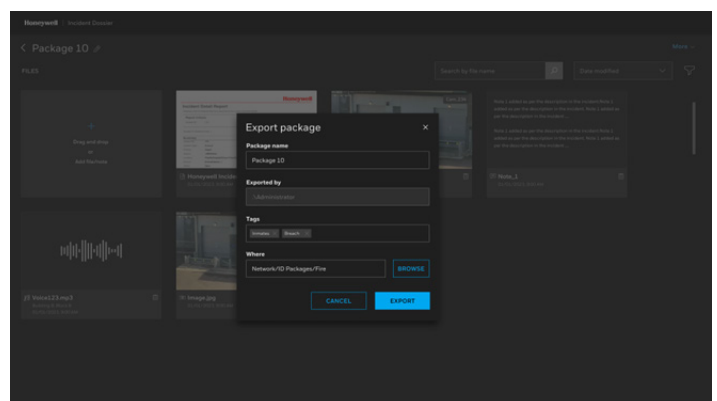

SEAMLESSLY IMPORT VIDEO FROM DVM

With Incident Dossier, integrating video evidence from versions of DVM R700 and above is designed to be effortless and efficient. You can directly interface with your existing DVM infrastructure, assisting quick and easy importation of critical video footage. This integration can help save time and maintain the integrity of your video evidence throughout the investigation process.

EXPORT AND SECURE FILES

When it's time to share or archive your evidence, Incident Dossier helps to make the process simple and secure. With just a few clicks, you can export your entire dossier, or just selected components, with all files packaged and encrypted for maximum security. This feature not only helps facilitate easy sharing with authorized parties but also enables the long-term integrity and confidentiality of your sensitive information.

WHEN TO USE INCIDENT DOSSIER

Honeywell Incident Dossier can help enable your investigation by giving you access to evidence in a consolidated, secure platform and streamlines internal reviews, potential legal proceedings, industry compliance and even insurance reporting.

RETAIL THEFT INVESTIGATION

Compile video footage, witness statements and inventory reports to more efficiently share with law enforcement and insurance companies.

HOSPITAL SECURITY INCIDENT

Gather real-time reports, video footage and nurse call data to coordinate responses and help improve future response strategies.

CORPORATE FRAUD INVESTIGATION

Organize your transaction records, email communications and employee interviews to build a comprehensive timeline for internal investigation in a single interface.

WHEN TO USE INCIDENT DOSSIER

NATURAL DISASTER RESPONSE

Compile damage reports, rescue operation logs and resource allocation data to help coordinate efforts and create emergency services after-action reports.

WORKPLACE ACCIDENT DOCUMENTATION

Pull together your employee sign-in logs, safety records and witness accounts to help enable compliance and facilitate investigations.

PRISON INCIDENT DOCUMENTATION

Collect guard reports, video footage and inmate interviews following security breaches or altercations.
