

# MAKE BUILDING AIR QUALITY A KEY PERFORMANCE INDICATOR

Your school's air quality impacts the educational mission, and should be frequently checked to help comply with industry regulations and guidelines. Honeywell building management systems and services can help you maintain your school facilities' air quality in pursuit of an open and comfortable learning environment. All while managing cost and energy efficiency.

## PLANNING FOR IMPROVED SCHOOL INDOOR AIR QUALITY? HERE'S A QUICK CHECKLIST

- Manage air flow**  
Adequate fresh air exchange can support student comfort and allow staff to focus on teaching. Find out how Honeywell [actuators](#) and [economizers](#) can help bring in the right amount of fresh air based on occupancy and environmental conditions, and help meet school building regulations. 
- Control temperature**  
Maintaining the proper climate in your building improves occupant comfort and health. Find out how our [wall modules and commercial thermostats](#) can manage temperatures in your schools. 
- Balance humidity**  
Abnormal humidity levels can foster an unhealthy environment for students and staff. [Humidity sensors](#) can help manage and maintain comfortable humidity levels for your school building. 
- Control and change room pressurization**  
Room pressurization and air circulation are key components in critical environments such as restrooms and nursing stations. Learn about how [Venturi valves](#) can help maintain proper positive or negative pressurization in spaces where it matters most. 
- Consolidate facility control systems**  
Take advantage of IP-grade cybersecurity, universal I/Os, and groundbreaking twisted pair T1L technology, so you can access HVAC data without disruptive and expensive infrastructure upgrades with the [Honeywell Optimizer Unitary Controller](#). 
- Dashboard and reporting**  
Take your facility management to the cloud with [Honeywell Remote Building Manager](#). It's building control software that makes it convenient and more cost effective to manage your site from wherever you are. 
- Learn more about the latest [guidelines](#)**
