Connected Life Safety Services (CLSS)

Honeywell

CONNECT AND CONTROL FROM YOUR MOBILE DEVICE

Honeywell Connected Life Safety Services places connectivity at the heart of fire safety, providing visibility to drive timely and accurate decision making.

The Honeywell CLSS platform harnesses the power of hardware and software to transform the way systems are designed, installed, monitored and maintained.

Whether you are looking to streamline commissioning, increase service productivity, or access reporting anytime, from anywhere, look to Honeywell CLSS

CHANGES HAPPEN DURING COMMISSIONING — LET CLSS MODIFY ON THE FLY

With bluetooth authentication to your fire alarm control panel (FACP) Honeywell CLSS allows you to commission faster and more precisely than ever before. CLSS allows you to install, test, and monitor devices from anywhere in a facility during installation — on multiple mobile devices.

ELECTRONIC REPORTS — AT YOUR FINGERTIPS

CLSS keeps a full repository of indisputable electronic records, date stamped with technician credentials. These electronic records are available anytime, from anywhere on a secure cloud server, reducing the need for barcoding, complicated excel records, or cumbersome paper filing.

FACILITY TESTING IN HALF THE TIME

CLSS enables faster test and inspect, with the assurance that no device is missed. With bluetooth connectivity from multiple devices in one facility, CLSS allows for multiple technicians to actively test a facility, or for one technician to test and reset a panel from anywhere in a building, eliminating the need to run back to the panel throughout testing.

A SYSTEM THAT GROWS WITH YOU

As your business grows, CLSS is your source for innovative software to help drive revenue and bring industry leading solutions to your customers. CLSS is being continually developed with your needs in mind. Whether you are looking to increase revenue, improve efficiency or have a view of all of your facilities in real time, CLSS is your tool for the future.

STAY CONNECTED STAY PROTECTED

CONNECTIVITY

CLSS' end-to-end, cloud-powered connectivity is the future of fire systems - providing new opportunities for building managers and partners to optimize on-site safety.

HONEYWELL FIRE UNDERSTANDS THE VALUE OF TRUSTED RELATIONSHIPS BETWEEN PARTNERS AND THEIR CUSTOMERS

CLSS connects and identifies every panel and device on site, increasing confidence that the whole system is being commissioned, maintained, or managed.

CLSS OFFERS BUILDING OWNERS AND MANAGERS FIRE SAFETY SYSTEMS WITH THE SAME USABILITY AND CONNECTIVITY AS OTHER BUILDING SYSTEMS

CLSS achieves this with an easy to use app available on PC or mobile device. CLSS builds on the trusted integrity that we have with our channel partners. Be assured that your end user data is secure and only accessible by you.

VISIBILITY

CLSS provides enhanced visibility of system performance, reducing the operational cost of maintenance while ensuring the optimum performance and compliance of critical fire safety systems.

CLSS REDUCES COMPLEXITY AND COST IN SYSTEM COMMISSIONING

The CLSS software has the ability to perform a range of actions without having to return to the panel. These actions can be used to streamline commissioning and inspection processes.

CLSS INCREASES EFFICIENCY BY FINDING THE SOURCE OF SYSTEM FAULTS

The data harnessed by CLSS brings increased visibility to the root of false and nuisance alarms, allowing you to protectively maintain the system before an alarm sounds

INTELLIGENCE

CLSS provides data and reporting to help understand system issues and proactively plan maintenance.

CLSS' DATA INSIGHTS HELP PARTNERS STAY ONE STEP AHEAD OF THEIR CUSTOMERS' NEEDS

CLSS' advanced reporting means that our partners can anticipate when and where maintenance and upgrades are required. CLSS inventory and deficiency reports help customers ensure their systems are operating at peak performance and plan ahead for maintenance.

CLSS IS CONTINUALLY ADVANCING TO BRING VALUE TO YOUR END USERS

CLSS will continue to evolve and grow to keep partners and end users at the forefront of the fire and life safety industry, bringing efficiency, visibility and safety to your business.

**WHAT
IF**

**YOU COULD HELP YOUR TECHNICIANS
AVOID DELAYS ON SITE?**

**YOU COULD VIEW YOUR ENTIRE
MAINTENANCE PORTFOLIO
FROM YOUR OFFICE**

**YOU COULD STREAMLINE
COMMISSIONING AND NEW
PROJECT HAND OVERS?**

**YOU ONLY NEEDED
ONE TECHNICIAN
FOR EACH VISIT?**

**YOU COULD PROVIDE INDISPUTABLE
COMPLIANCE REPORTS TO YOUR
BUILDING OWNERS?**

CLSS gives engineers a clear picture of their site visit before they arrive on site. Detailed system information increases first time fix rates and maintenance performance.

CLSS provides deep insight by device, building, customer, and location. System status information enables more efficient maintenance planning as well as real-time monitoring of system events.

CLSS delivers control functionality to the palm of your hand. When on site you can disable update to NOTIFIER panel outputs, activate sounders, reset the panel activating LEDs to confirm location, and even update device labels.

The functionality of CLSS software provides ability to test with only one technician on site. The unique control features are managed in the mobile app, reducing the reliance on a second engineer.

Remote access provides you with a consolidated view of your customers' systems and insight into progress of planned maintenance. An overview of maintenance progress against plan is possible along with accessing regulatory and non-regulatory reports at a touch of a button.

NOW IT IS POSSIBLE WITH CLSS
