Open, Closed... Confused?

A CPD guide to the Protocol argument within the fire alarm industry.

Duration – 1 hour

Who should attend - Those in the fire industry involved in the design, installation, commissioning, maintenance and servicing of Fire systems. Consultants, Specifiers and those interested parties in the debate of protocol in the market place.

External Approval - CPD Service

Course details

The Seminar is aimed at helping to explain the often mixed messages in the industry with regard to Fire Alarm Protocols, in particular Open and Closed. It explains what protocol actually means, as well as the impact it has on the choice of fire systems provider, and on the on-going essential service and maintenance to ensure a site is managed in accordance with current legislation.

Certificates of completion are awarded to attendees completing the course.
