Honeywell

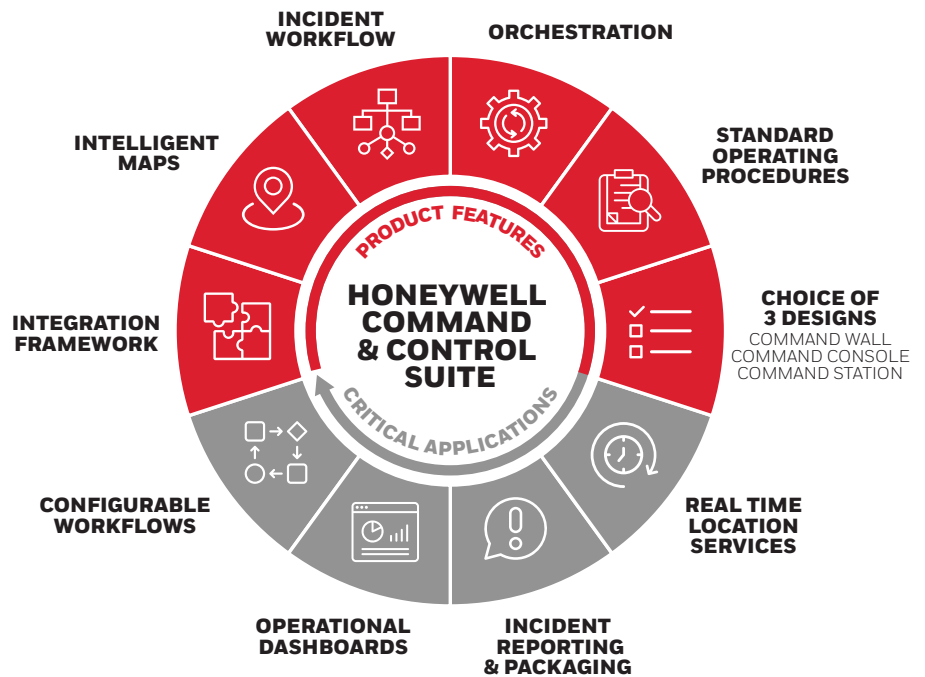

TECHNOLOGY ENABLING EVOLUTION

Honeywell's Command and Control Suite, a Physical Security Information Management platform, has been designed for the corrections environment to empower your security operators to manage everyday operations and unexpected events more effectively.

The operational paradigm of people, process and technology is the foundation of any Correctional facility. As the pace of innovation accelerates, your ability to evolve your technology ecosystem to better empower your people and enhance processes will enable intelligent outcomes for your facility.

Going beyond the capabilities of a traditional security management system, Honeywell's Command and Control Suite (CCS), is a Physical Security Information Management (PSIM) platform, focused on end-to-end incident management workflow. The feature rich capabilities empowers security operators to achieve a superior level of operational efficiency, improve speed and consistency of workflow and enhance life safety and security outcomes.

KEY FEATURES

INTUITIVE INTERFACE FOR DEEP INSIGHT & FAST ACTION

Integrated alarm management

Map visualisation of alarm for contextual awareness

Incident workflow & standard operating procedures

One-click call-up of associated cameras for faster analysis

Ease of orchestration with map and video wall

Simplistic touch screen for ease of use

Configurable frequently used actions for operational efficiency, e.g. movement control

A PROVEN CUSTODIAL SOLUTION

Based on an open integration industry standard architecture, CCS provides the flexibility and scalability to adapt with your facility's evolving requirements and security needs.

ECOSYSTEM EXPANSION OFFERS FREEDOM OF CHOICE

Proven integration to more than 60 vendors in Corrections environments across the globe & API's for rapid integration.

CONFIGURATION OPTIONS FOR OPERATIONAL EFFICIENCY

Command Station
Designed for Occasional Users

Command Consoles
Designed for Security Operators

Command Wall
Designed for Incident Response and Collaboration

A SMART EVOLUTION

Empower your team with a custodial grade PSIM solution for end-to-end incident management and operational efficiency.

INTEGRATE

Integration framework to unify disparate systems and devices.

ANALYSE

Intuitive analysis and display of data, events and alarms to identify risk.

VERIFY

Intelligent maps for contextual situational awareness to verify risk.

RESOLVE

Incident workflow, standard operating procedures, orchestration for fast resolution of risk.

REPORT

Incident dossier* and reporting capabilities for holistic packaging up of events and incidents.

** available in 2022*

AUDIT

Transparent digital workflows for audit trail.

INTELLIGENT OUTCOMES UNIFY PEOPLE, PROCESS AND TECHNOLOGY

PEOPLE

Custodial staff, inmates, visitors and the general public.

Enhanced productivity

Intelligent feature-rich map interface maximizes situational awareness and empowers operators with an optimal user experience requiring less clicks to achieve tasks.

Operational intelligence

Flexible dashboards transform abundant data into actionable insights for informed decision making to mitigate operational risk.

Enhance life safety

Empowering security operators with a best-in-class platform to manage everyday activities and unexpected events more effectively, promoting a safer and more secure environment for all.

PROCESS

Incident management, standard operating procedures, digital transparency & collaborative workflows.

Faster response

Configurable and integrated incident workflows improves the speed and consistency of incident response for optimal outcomes.

Reduce complexity

Seamless integration of disparate systems unified on an intelligent interface for effortless orchestration that reduces complexity and operational siloes.

Streamline workflows

A powerful integration rules engine can simplify operator workflows, reducing operator fatigue and promoting vigilance in critical environments.

TECHNOLOGY

Open platform for freedom of choice & future readiness.

Freedom of choice

Unlock access to 60+ third party proven integrations and APIs for freedom of choice of sub-systems and devices

Custodial grade platform

Robust, scalable and proven platform empowering correctional facilities and high security environments around the globe.

Supported future-ready solution

Generate strong ROI with less intrusive updates and ease of adopting innovation to address evolving requirements and security needs.

About Honeywell

Honeywell is a \$40b company with a global knowledge network and industry leading technology. Our local teams are empowered and equipped to bring that personal touch – this keeps the things that matter the most running smoothly. Honeywell provides a safe and secure foundation, and an innovative mindset to develop each jurisdiction's capability and service outputs into the future. Our local teams are passionate about the value of integrating surveillance and security with a support and well-being model. Working together, the future is what we make it.
