

TREND CPD SEMINAR

Take back control to achieve sustainable energy savings

Overview:

The fastest and most effective route to sustainable energy savings is to review and optimise the performance of the Building Energy Management System (BEMS). As much as 84% of your building's energy consumption could be under the control of a BEMS. But are you in control of it? This seminar explains how you can significantly reduce the energy consumed within your building, using an asset that you probably already own.

Course details:

Managing energy consumption is a business imperative. The cost of energy used within the built environment continues to rise at an alarming rate and will remain at a premium until we find more efficient ways to power our daily lives without the heavy reliance on fossil fuels.

As a result many businesses are turning to alternative renewable energy sources such as solar and wind power, or expending substantial amounts of capital in the renewal of building services plant and equipment, such as installing condensing boilers and plate heat exchangers. However, simply by making your BEMS work harder, you can reduce your energy usage and make improvements in line with your carbon reduction (CRC) commitments.

Energy savings are relatively quick and simple to achieve and consistently offer an excellent return on investment. A well managed BEMS provides numerous opportunities to reduce energy consumption, without adversely affecting comfort conditions of the building occupiers.

The course includes:

- How to take back control of your building energy usage
- Effective day to day management of your BEMS
- A step by step plan to achieve sustainable energy savings

WHO WILL BENEFIT

This seminar will be beneficial to all Building Services professionals and End Users who need their Building Energy Management System to reduce their energy usage and carbon emissions

- I would like to receive details on the following CPD seminar(s)
 I would like to arrange a presentation on the following CPD seminar(s)

TITLE	DESCRIPTION	
BEMS Systems Simplified	An introductory look at the world of Building Energy Management Systems (BEMS). This will explain the jargon and expose the myths – leaving you in a better position to understand and to translate your requirements into a system that will fulfil your criteria.	<input type="checkbox"/>
Building on your BEMS	The BEMS industry is evolving and converging with the IT world on technologies and networks. This presentation explains the various local and wide area networks commonly used for BEMS communications.	<input type="checkbox"/>
Complete control with BEMS	This presentation explains how BEMS controls can provide the solution for any number of specific customer requirements – from standard HVAC plant to much wider applications such as lighting.	<input type="checkbox"/>
Take back control	As much as 84% of your building's energy consumption could be under the control of a BEMS. But are you in control of it? This seminar explains how changes to the usage of a building over time can significantly affect the energy consumed and demonstrates how to take back control and to achieve sustainable energy savings going forward.	<input type="checkbox"/>
Building Regulations, Standards, Legislation and BEMS	This seminar provides an entry level overview of the regulations, standards and legislation affecting the UK building industry, and outlines how your BEMS can help towards requirements and compliance.	<input type="checkbox"/>
Integrated Building Management	This seminar will show you how to take control of your building portfolio by developing a coherent centrally managed estate strategy and in turn exploit the inherent capabilities of your Building Energy Management Systems (BEMS).	<input type="checkbox"/>
Sustainable high quality patient care environments	This seminar aims to educate and drive behavioural change of BEMS designers and operators in order to utilise the BEMS fully to achieve sustainable, efficient, high quality patient care environments.	<input type="checkbox"/>

I would anticipate that the possible audience may number: up to 5 people 5-10 11-20 over 20
