

MAXPRO® ACCESS ENABLES NIS2 COMPLIANCE

Honeywell Commercial Security now offers competitive pricing on MAXPRO® Access, to help you and your customers meet the highest cybersecurity standards of NIS2 Directive compliance.

MAXPRO® Access offers traditional access control benefits, such as door management, employee access, permissions, and scheduling, across multiple site locations. It can be managed through WIN-PAK, the built-in Web Browser or MAXPRO® Cloud secure cloud infrastructure, simplifying the management and monitoring of building security.

Ensure your access control solutions comply with NIS2 standards to avoid penalties and liabilities. MAXPRO® Access offers you:

- Software as a Service (SaaS) managed by Azure
- All data encrypted with TLS1.2 AES256 bit between host and server
- 2-factor authentication
- Point to point encryption with OSDP v2
- Audit and compliance reporting
- Dual authentication for data and technical rooms
