

An aerial, high-angle photograph of a modern, multi-story building with a distinctive curved, metallic facade. The building's design is futuristic, with sweeping lines and a mix of grey and white panels. A prominent feature is a large, curved walkway or balcony that wraps around a portion of the building. Below the building, a street with a red-painted curb and some greenery is visible. The overall scene is brightly lit, suggesting a clear day.

OPERATIONAL SECURITY THAT IMPROVES OPERATIONAL EFFICIENCY

Optimize your oversight with the next generation of Honeywell Digital Video Manager, updated to enhance your awareness, responsiveness and operational efficiency.

Honeywell Digital Video Manager
(DVM Release 800)

Honeywell

EFFICIENT OPERATIONS START WITH RESPONSIVE SAFETY

Honeywell Digital Video Manager (DVM) gives you smart video network management built on a resilient platform that's designed to integrate new capabilities such as the latest IP cameras, video analytics and encryption so you can more effectively maintain vigilance and mitigate risk while enhancing the efficiency and safety of your operations.

OPTIMIZE YOUR OVERSIGHT: HONEYWELL DVM RELEASE 800

The latest release updates your capabilities to achieve seamless integration, robust awareness and detailed insights through enhanced map-based visibility across your site.

- **Deepen security insights** and control with the Integrated Operations suite, take control of day-to-day operations or situation management
- **Improve performance and stability** with Microsoft compatibility for Windows® 11, Windows Server® 2022 and SQL Server® 2022
- **Protect your operational technologies (OT)** with latest best practices for encryption and cybersecure design with improved monitoring of camera cybersecurity posture
- **Improve operational efficiency** with expanded video analytics solutions at the edge

REINFORCE OPERATIONAL EFFICIENCY

Honeywell DVM's deep integration with Honeywell EBI enables operators to respond with greater accuracy and fewer clicks, using new automated EBI workflows work and a faster "single pane of glass" experience throughout EBI's map-based interface.

AUTOMATE THE USER EXPERIENCE

Improvements to the operator experience including greater automation and mobile access helps users stay alert to activity throughout the site, with easier remote management of alarms, video systems and access control.

IMPROVE CYBERSECURITY

A complete refresh of the core operating system and built-in SQL Server better protects your site from cyber risks and improved monitoring of camera firmware status helps maintain IoT devices with the latest firmware version to help protect against cybersecurity threats.

BUILD RESILIENCE

Honeywell DVM R800 upgrades capabilities for redundant recording and easy scalability, helping your operations adapt as needs change. Robust new analytics also enhance awareness and responsiveness, including campus and smart city capabilities.

PROTECT OPERATIONAL UPTIME

Maintain continuity and reduce risk. Honeywell DVM R800 provides the video management platform of the Honeywell Integrated Operations Suite, and is available with hot standby active-active redundancy for management and recording servers. The platform can be hosted on physical hardware or your organization's virtualized or private cloud infrastructure.

Protect your people and your property more effectively with Digital Video Manager (DVM)

<https://hwl.co/DigitalVideoManager>

PART OF THE HONEYWELL INTEGRATED OPERATIONS PLATFORM

DVM natively integrates with Enterprise Buildings Integrator (EBI) and the Command and Control Suite (CCS), giving you intuitive, map-based control of your building operations, video systems and incident response.
