

WHEN BUILDINGS PERFORM SO DO BOTTOM LINES

Help your building operations reach
their full potential – with Honeywell

Honeywell Building Performance Services

Honeywell

HONEYWELL BUILDING PERFORMANCE SERVICES

It's time for building management and maintenance to get proactive. An approach not limited by "standard" operating hours or on-call staff. Let's break the cycle of reactive troubleshooting to create better visibility for building maintenance with one-click reporting and optimized equipment lifecycles.

In short, it's time for a plan to improve safety, compliance, and occupant experiences – and help your building reach its full potential.

WE KNOW YOUR BUILDING

Your results are our commitment: Whether you need essential maintenance and training, or full-service monitoring and lifecycle management, we're here help your building – and your business – meet your goals.

MORE EFFICIENT

Lower costs

Save energy

Reduce energy use by 10–20% with site management and Honeywell Forge Energy Optimization software*

Remote service capabilities

Our service experts can fix up to 40% of issues more quickly without dispatching a tech – and can remotely assess the rest to increase first-time fixes for on-site techs

Optimize equipment lifecycles

Maximize your return on investment by keeping systems operational and cost-effective

Rely on expert capabilities

Leverage our robust training or our highly specialized team to get the most from your building

MORE RESILIENT

Reduce risks

Fixed right the first time

Detailed histories of your site and each asset help drive first-time fixes for on-site visits

Cybersecurity

Best-in-class site assessments, protection, and remote monitoring

Alarm management

Reduce alarm fatigue and ensure you're responding to the right alarms at the right time

Proactive maintenance

Identify, isolate, and act on issues before they result in a system failure

Resource planning

Aging workforces represent a risk to continuity; Honeywell can provide specialized resources on demand

MORE ACCOUNTABLE

Build a stronger reputation

Indoor air quality

Improve the well-being, comfort, and productivity of people in your building

Safety & security

Track other safety concerns like risky activity and behavior, and get alerts when optimal conditions aren't met

Improve productivity

Manage flexible workspaces to foster collaboration and community

Compliance management

Ensure regulatory guidelines are met, such as safety requirements or environmental and emissions regulations

*Results are based on Honeywell "before and after" analysis at selected customer sites and are not necessarily typical. Such analysis compares site performance before deployment of Honeywell solutions to post-deployment performance, without necessarily controlling for other factors that may have affected results. Your results may vary.

SERVICE THAT ADAPTS TO YOUR NEEDS

Let's talk options: From smart tools to empower your own facility team to remote support and full service, we'll help you design a service contract with the right combination of proactive capabilities, technologies, and expert service.

CHOOSE YOUR LEVEL OF SERVICE

BENEFITS OVERVIEW*

Foundational

- Industry best practices and compliance
- Success reports to identify improvement areas
- Remote-first support model to reduce cost of triage support

Advanced

- Foundational plus:
- AI-based maintenance to improve uptime of assets
 - Industry-leading cyber protection
 - Energy conservation

Assurance 360

- Advanced plus:
- Reduced need for on-site staff
 - SLA-guaranteed, fully managed energy savings and system uptime outcomes

HOW HONEYWELL DELIVERS FOR YOUR FACILITY

THE NEW HONEYWELL SERVICE MANAGEMENT SYSTEM

We're dedicated to meeting or exceeding your service level agreements (SLAs) on every job, every time. The Honeywell Service Management System is our platform to set up and manage your service contract, and then bring you five-star service that's responsive, reliable, consistent, and transparent.

A smarter way to manage service

The new system customizes service to your installation and develops detailed insights that evolve with your facility. This results in faster dispatching of right-skilled technicians, detailed equipment histories and reports, real-time status updates, and more.

Self-service portal

- Your one-click stop for quick and flexible support, 24/7
- Log new requests and check status
- Each request receives a job number, and an appointment for a field-service professional to resolve it
- Review, customize, and download service reports

Job visibility & reporting

- Automated alerts on job status and completion
- Real-time KPIs (key performance indicators) show performance and service quality for each field-service professional
- Full reports provided for each job

HONEYWELL BUILDING OPERATIONS CENTERS (HBOC)

Our Building Operations Centers bring more than 30 years of domain expertise to ensure your site is supported with the right skills around the clock, no matter where you're located – 24/7/365.

This centralized, global team of engineers and service expert uses secure, remote connections to monitor your site and diagnose issues – quickly fixing up to 40% of them. For issues that require on-site service, we dispatch a field-service professional via the Service Management System, briefed with full details.

With HBOC support, you can significantly reduce downtime risks for your facility:

- Faster responses to emergency calls
- Resolve issues remotely for optimal uptime
- 24/7 monitoring to identify issues early
- Fewer site visits needed

AI-BASED OPTIMIZATION WITH HONEYWELL FORGE

As an Advanced-tier service option, your Building Performance Services can be enhanced with capabilities from the Honeywell Forge ecosystem. Honeywell Forge uses machine learning to develop real-time analytics of your building's performance, then uses these insights to prevent breakdowns and reduce operational costs.

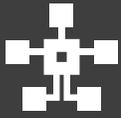

For instance, predictive analysis lets you know when an asset actually needs maintenance, before its performance is affected. Likewise, Honeywell Forge can automatically "tune" building systems every 15 minutes to optimize how your site uses energy – reducing your costs by 10–20%.

In short, it's a fundamental change to the performance your building can deliver.

3 GLOBAL REMOTE BUILDING OPERATIONS CENTERS – AND GROWING

Each center combines state-of-the-art technology and building management expertise to provide 24/7/365 operations support to buildings with Honeywell systems.

Services for single site to multi-site enterprises

1,147
Alarms and calls handled/ addressed a day

91%
First time remote fix

24/7/365
Remote service support

17,000
Sites connected across the globe

Engineering, design and field services

46
countries

330+
offices

22,000+
Enterprise Buildings Integrator installations

5 million
buildings worldwide are powered by Honeywell technologies

4 Global Technical Assistance Centers
4 Solution Design Centers

CENTERS OF EXCELLENCE
ICT, Software & Hardware, Engineering

3 Global Learning Centers
28 Regional Engineering Centers

Lower building costs. Reduce risks. Build a stronger reputation.

Let's help your building reach its full potential
