**GET COMFORT, PEACE OF MIND
AND SAVINGS WITH LCBS CONNECT™**

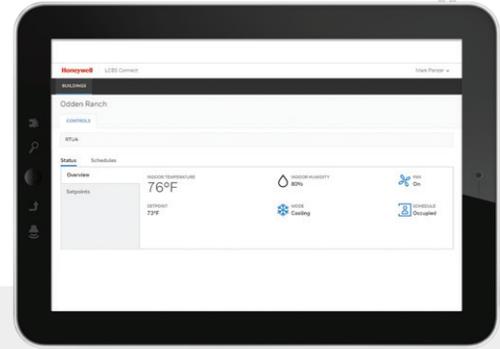

Managing Your Buildings Just Got Easier.

With Honeywell's LCBS Connect™ and 24/7 monitoring from your HVAC service provider, you can deliver the comfortable environment that occupants want while enjoying the energy efficiency your business needs. The solution helps reduce tenant too hot/too cold complaints, lowers maintenance time and costs, and maximizes HVAC system reliability and efficiency.

The system uses cloud connectivity to keep your building in constant touch with your HVAC service provider. The remote monitoring and diagnostic reporting allows your HVAC service provider to increase the speed of repairs in the event of a service interruption. In many cases, the issue is resolved before your tenants – or even you – are aware of it. That's proactive repair. That's reliability. That's true peace of mind.

Above all, you'll be in control. You'll work with your HVAC service provider to determine what triggers an alert. The Occupant View feature allows you to monitor your building's HVAC system at a glance. Plus, if your facility includes more than one building, LCBS Connect covers the entire enterprise. It all adds up to a personalized solution that saves you time.

Simply put, you'll have an easy, cost-effective way to manage your buildings.

FEATURES & BENEFITS

Occupant Comfort. The system reliability helps maintain ideal comfort conditions.

System Reliability. Remote monitoring and diagnostics help ensure that small problems are fixed before they grow.

Peace Of Mind. The proactive maintenance, communication and efficiencies all make life easier for you.

Energy Efficiency. The combination of quality Honeywell products and responsive service help maximize efficiencies.

Total Control. Connect one building or an entire enterprise.

Put Connectivity To Work For You

LCBS Connect consists of three pieces of equipment that your HVAC contractor installs quickly and easily. The solution delivers real-time operational information directly to your contractor for 24/7 monitoring and diagnostics. Contact your contractor today – then all you'll need to do is sit back and enjoy the peace of mind.

For more information contact your HVAC service provider or call **1-800-466-3993**.
