Why upgrade to the NOTIFIER ONYX® Series

1. **Protect your installed base:** Proactive upgrading makes most efficient use of the installed assets
2. **Get replacement parts for ONYX Series**
3. **Uninterrupted operation with continuous spare parts supply.**
4. **Minimise downtime on upgrades**
   - Upgrade kits are available to replace old hardware with new compliant solutions
   - Backwards compatibility allows continuing use of most addressable field devices like detectors and modules
   - ONYX AFP-3030 Database migration tool allows AFP-2800 Config Database to be imported to VeriFire Tools
   - Product support

5. **Seamlessly integrate NOTIFIER's complete line of detection products**
   - PTIR detectors for superior nuisance rejection
   - Intelligent VESDA-E detection
   - SWIFT wireless detection in hard to wire areas

6. **Integrate Connected Life Safety Services remote monitoring systems**
   - Automate the testing processes through unique and industry's first system control via mobile or tablet
   - Generate annual and monthly test compliance reports at a click on the phone
   - Diagnose faults better and improve your field service experience
   - Monitor your sites remotely and stay notified with App or web notifications through CLSS

7. **Take advantage of new application flexibility**
   - Do firmware and configuration upgrades centrally
   - VeriFire Tools features such as new reports, simulations, diagnostic tools, and programming shortcuts

8. **Certified to latest Australia Fire detection standards AS7240.2-2004, AS7240.4-2004, AS4428.3-2010**
9. **Fresh warranty on all new NOTIFIER manufactured products**
10. **Your customers can phase in product replacements with backward compatibility**
    - Replace or upgrade panels without changing detectors, modules, and AAD/VAD devices
    - Replacements can be phased in over time to reduce up-front costs (subject to project requirements)
    - Possibility for Notifier AFP-2800 and ONYX AFP-3030 to co-exist on a common network interface, enabling mixed system networks.

It's easy to take advantage of the NOTIFIER ONYX Life Cycle Replacement Program

Special CLSS (Connected Life Safety Services) offer: Free use for 12 months. Consisting of 1 gateway and 12 months site license.

Additional 1-Year Warranty, on Fire Alarm Control Panel upgrade 3 years to 4 years*
*only applies on Fire Alarm Control Panel that is newly purchased.

01-DEFINE
Contact your Notifier Systems Consultant to complete the system checklist together

02-PLAN
Establish staged upgrade plan with your Notifier Systems Consultant and Product Support

03-ACTION
Replace the superseded systems with the latest AFP-3030

***Notifier professional services: Database upgrade and commissioning support is available**

Offer valid only for orders placed by June 30 2025 in Australia or New Zealand.

While many configurations of legacy products from NOTIFIER have been installed, this program is for the core components required to upgrade to an ONYX AFP-3030 system. This special offer applies to AFP-2800 upgrades only.

Product Support from NOTIFIER is available to answer questions about upgrading a system.

To assist in the upgrade process, NOTIFIER can support with configuration conversions via ONYX AFP-3030 database Migration tool. This tool allows the AFP-2800 Configuration Database to be imported to VeriFire Tools eliminating a significant amount of programming time. Point hardware, configuration and descriptors are migrated during the process.
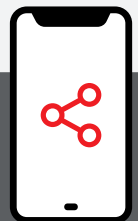

Offer your customers the latest technology in fire and life safety systems by delivering a system with features to meet their present and future requirements. The ONYX Series upgrade will strengthen your reputation as the premier fire alarm provider in your service area.

Contact your Notifier Systems Consultant to take advantage of the ONYX Series upgrade.

Share your AFP-3030 upgrading story on social media to claim 12 months CLSS Software user license #myAFP-3030upgrade
