## Temperature and Humidity Sensor for Low Temperature Environment

---

### General Description

NETVOX Wireless Sensor R718A is capable to measure temperature and humidity at low temperature environment. R718A can be used in domestic and commercial refrigerators to store and transport food, medicines, flowers and other perishable goods, on the walls or in logistics refrigerators. Suitable as a data logger.

### Principle of Operation

R718A carries a built-in SHT-35 temperature and humidity sensor. SHT-35 temperature and humidity sensor can detect the current environment temperature and humidity. SHT35 temperature and humidity sensor and module (R100H/R100L) communicate through I2C.

### Features of NETVOX Sensors

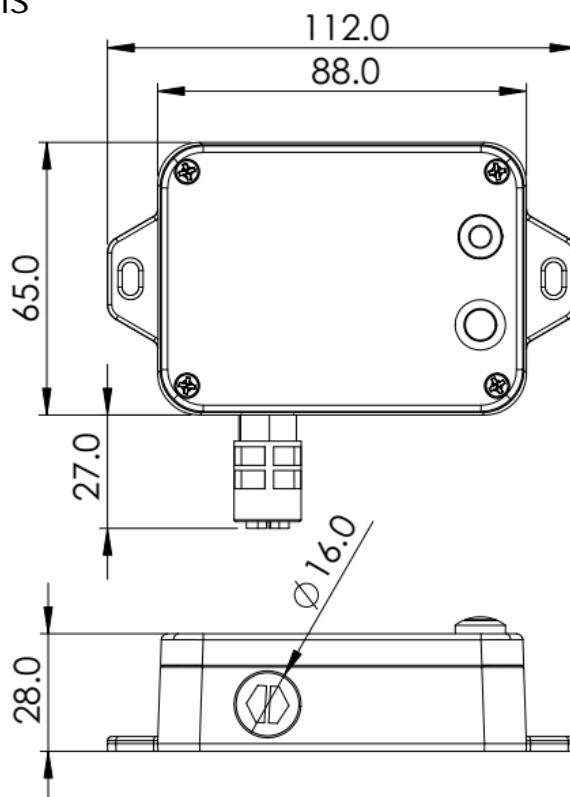

- Apply SX1276 wireless communication module
- 2 section of ER14505 battery in parallel (AA SIZE 3.6V / section)
- Temperature and humidity detection
- The base is attached with a magnet that can be attached to a ferromagnetic material object
- Protection class IP65
- LoRaWAN™ Class A compatible
- Frequency Hopping Spread Spectrum (FHSS)
- Third-Party online wireless sensor monitoring and notification system to configure sensors, view data and set alerts via SMS text and email (optional)
- Available third-party platform: Actility/ThingPark, TTN, MyDevices/Cayenne
- Improved power management for longer battery life
