AUDIBLE VISIBLE (AV) NOTIFICATION
Indoor L-Series with LED Offering

AV BEAM CO HVAC SPOT MODULES RELAYS

Introducing the next generation of L-Series audible visible notification appliances with LED indoor strobes and horn strobes.

LOWER CURRENT DRAW

- 40% lower current on average vs. L-Series xenon appliances across the entire candela range

- Lower current draw can increase the number of appliances on a NAC

- More design flexibility can lead to fewer power supplies needed to support the appliance on a NAC

TEST FASTER

- Digital voltage meter (DVM) diagnostic test points enable faster troubleshooting of appliances without removing them from wall or ceiling

- Applicable for end of line (EOL) voltage measurements

BE FLEXIBLE

- Accessories such as lenses and bezels to fit your application requirements

- Compatibility with legacy System Sensor SpectrAlert, SpectrAlert Advance and L-Series notification appliances for retrofit applications
