

THE SUN IS SETTING ON THE 3G NETWORK

PROTECT YOUR CUSTOMERS FROM DISRUPTION

All major mobile carriers will shut down their 3G networks in 2022 – but the Honeywell CLSS Pathway gives you an easy path to new capabilities and higher RMR, with reliable connectivity to keep customer facilities secure during the transition, and beyond.

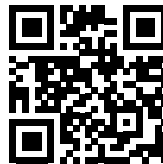

The Honeywell CLSS Pathway Commercial Fire Communicator

- Dual-path IP and dual-SIM cellular communications, with 5G-ready multi-carrier support
- Compatibility with most central stations
- Real-time monitoring and alerts with the Honeywell Connected Life Safety Services (CLSS) mobile app
- Time-saving CLSS CheckPoint software generates inspection reports in seconds

Upgrade your customers without the hassle of a rebate and ensure code compliance using the new Pathway 5G communicator.

The CLSS Pathway (HW-AV-LTE-M) is now available from your local Honeywell Fire authorized security distributor.

For more information about the Honeywell CLSS Pathway, scan this code or visit:
