

EFFICIENT, SCALABLE AND CONNECTED.

Honeywell XLS4000 Series Fire Alarm Control Panel

Introducing the Honeywell XLS4000 series: a fully networkable life safety system designed to scale up with any installation, minimize the needs for equipment changes, and provide secure connectivity with industry compliance. This scalable panel solution is now easier to install, simpler to use, and integrates the latest SW advances for testing, inspecting and maintaining life safety.

Honeywell XLS4000 enables modular **expandability** to be ready at any time – a system that grows with a building.

The Honeywell XLS4000 series reduces the amount of equipment needed, which in turn impacts the amount of maintenance, replacements parts, and overall inventory management required.

The **Network Control Display (NCD)** on the Honeywell XLS4000 series has a **modern and intuitive** touchscreen user interface designed to minimize human error and meet today's building aesthetic needs.

The new **ACM-30 annunciators** are more **versatile** than ever and can be programmed as LED indicators, action buttons OR a combination of both – all within the same product.

Honeywell

Honeywell XLS4000 provides reliable protection and monitoring over the system lifecycle with the Honeywell Connected Life Safety Services (CLSS) platform.

Connected Life Safety Services (CLSS) delivers real-time information to installers, service technicians and the end user.

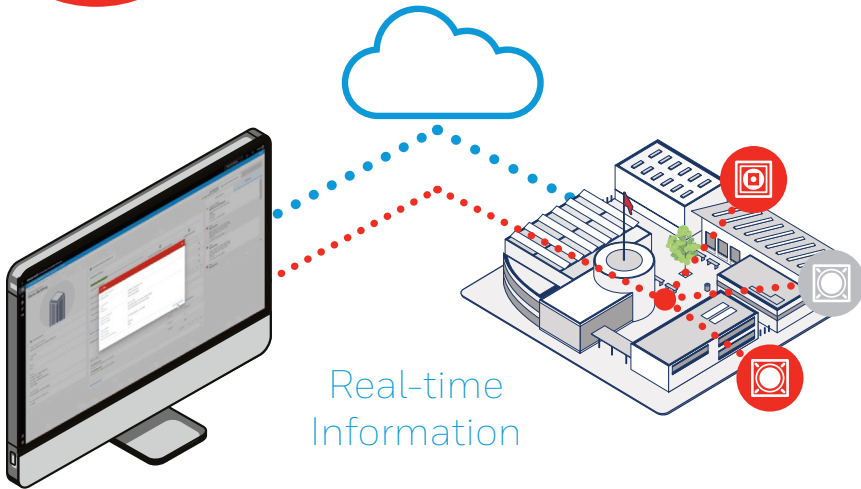

With XLS4000 and CLSS, technicians can do the following tasks **remotely**:

- > **View** all of the buildings on a connected site
- > **Diagnose** and troubleshoot problems ahead of time, improving first time fix rate and reducing time spent on-site
- > **Download and share** reports instantly once the job is done – no manual transcription needed

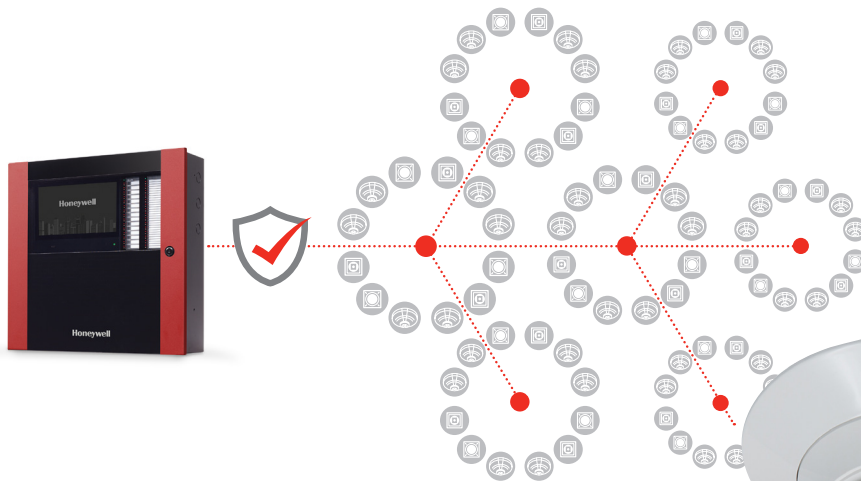

What's more, the Honeywell XLS4000 series unlocks access to the world's first **self-testing photo and heat detectors** that automate the test and inspection process.

When utilized together, Honeywell XLS4000, Honeywell Self-Test, and CLSS deliver a unique, game-changing solution that minimizes disruptions, maximizes what you can do remotely, and ensures compliance.

This solution is available exclusively through Honeywell.

Real-time Information

The Honeywell XLS4000 Series – an all-in-one solution that delivers reliable protection, scalability, efficient monitoring and timely reporting with unmatched flexibility.

Honeywell XLS4000: Efficient. Scalable. Connected.
