

BUSINESS SNAPSHOT FOR GOVERNMENT

FRANCE

BENEFITS

Trend's IQX is a standalone solution which can combine automated systems and lighting BMS whilst managing HVAC assets and HTML5 graphics and is compatible with IQVISION.

The French Customs building in Lyon has several sites where the end-user wanted a Niagara-based solution. Xpere and Trend demonstrated the value of IQX as a standalone solution to combine automated system and light BMS whilst managing the end-user's HVAC estate.

THE CHALLENGE

The French Customs building required an extension of its sites in Lyon and the end-user wanted a Niagara-based solution.

THE SOLUTION

Trend's technology partner, Xpere, installed 4 IQX controllers in the French Customs building in Lyon. IQX's value is a standalone solution which can combine automated system and light BMS whilst being able to manage HVAC assets and HTML5 graphics.

THE OUTCOME

Xpere was able to install a Trend IQX solution to manage the end-user's HVAC estate and HTML5 graphics. This provided heating and cooling to various climate systems within the buildings at the French Customs Building in Lyon.
