

PREPARING BUILDINGS FOR BUSINESS AS USUAL

With solutions for every business size and budget, we can help you safely reopen for business while addressing new challenges.

Complying to social distancing regulations is a new challenge for business owners and building managers as they work to create safer and healthier spaces. It's important to understand occupancy levels in order to meet social distancing guidelines. Deploying technology to automate people counting, people flow and occupancy level reporting can support these goals.

Adapting your integrated security to help manage building occupancy levels can provide improved oversight and control of critical health, safety and security factors and help reassure people returning to work.

Including intelligent video analytics is an easy and cost-effective way to help you control people in and out of your premises and sustain compliance.

HOW OUR INTEGRATED SECURITY SOLUTIONS HELP:

DEPLOY VISUAL WARNINGS

Use traffic light displays to manage building access.

MANAGE PROPERTY ACCESS

Create alerts to enable instant local response when building capacity is reached.

REDUCE STAFF EXPOSURE

Automate counting to reduce staff required to man building entrances and exits while track and trace functionality helps minimize staff exposure.

INCREASE PRODUCTIVITY

Manage people flow across single and multiple entry/exit points in a building and allow staff to focus on other priorities.

REMAIN COMPLIANT

Set automated daily occupancy level reporting to comply with regulations and use trend report insights to optimize operations.

KNOW IT'S SAFER, SHOW IT'S SAFER

Honeywell

SOLVING BUILDING OCCUPANCY CHALLENGES

CURRENT SOLUTION

Reporting accurate building occupancy levels to comply with regulations often requires additional staff to man doors and manually count people in and out.

CHALLENGES

- Increases staffing costs
- Exposes staff to potential illness
- Stretches scarce resources
- Relies on human accuracy
- Risks non-compliance with regulation
- Increases potential for theft

HONEYWELL SOLUTIONS

INDEPENDENT PEOPLE COUNTING SOLUTION

Ideal for small stores with a single entry/exit point

Staff monitor a simple single door entry/exit solution connected to a single screen that counts people in and out of the store.

Solution

HEN04123 Performance Series Embedded NVR with Free HDACS software (4 channel 2TB)
 HEN08143 Performance Series Embedded NVR with Free HDACS software (8 channel 4TB)
 HEN16163 Performance Series Embedded NVR with Free HDACS software (16 channel 6TB)
 H4L2GR1V equiP Series Saturn People Counting Camera

Solution covers the initial outlay costs with **two weeks** payback and helps meet future requirements and compliance demands.

ADVANCED PEOPLE COUNTING DETECTION

Ideal for larger buildings with wide or multiple entry/exit points

Multi-door entry/exit solution that monitors and controls people flow with traffic management, people counting and occupancy level monitoring. Daily resets and trend reporting ensures sustainable compliance with changing regulations.

Can be used as a part of NDAA Section 889 compliant systems.

HNMSWVMS - MAXPRO VMS R600
 HNMXE0804T - MAXPRO NVR XE - 8-channel 4TB storage
 HNMXE1608T - MAXPRO NVR XE - 16-channel 8TB storage
 HNMHVAPC - HVA People Counter per camera
 HC30W42R3 - 30 Series IP 1080p Mini Dome Camera

Solution covers the initial outlay costs with **three weeks** payback and helps meet future requirements and compliance demands covering multiple entrances.
