

# COMMAND BETTER OUTCOMES FOR YOUR CRITICAL HIGH-RISK FACILITY

Command and Control Solutions  
for Justice and Corrections Facilities

**Honeywell**

# OVERCOME YOUR CHALLENGES WITH THE RIGHT TECHNOLOGY PARTNER

Whether you're managing a minimum or maximum security correctional facility, you know that the challenges are immense: a fluctuating prisoner population, aging infrastructure, not enough skilled staff, continual security threats and ever-present budget constraints.

Honeywell can help. Our comprehensive security platform integrates with a vast ecosystem of specialized applications and connected devices, giving you the tools you need to reduce operational costs, manage risks and incidents more effectively, and help enable rehabilitation of prisoners to break the cycle of reoffending.

Our more than 30 years of experience, and more than 100 successful technology installations in justice and corrections environments around the globe, are proof positive: We are uniquely positioned to deliver an innovative, cost-effective technologies and service solution that will command better outcomes for your facility.

# COMMAND BETTER SECURITY OUTCOMES

## ENHANCE THE EVERYDAY SAFETY OF YOUR FACILITY AND EFFECTIVELY MANAGE CRITICAL INCIDENTS

The Honeywell solution starts with our powerful integrated security management platform – the Honeywell Command and Control Suite (CCS). This Physical Security Information Management System for government infrastructure is specially designed for mission-critical life safety and security operations like yours. CCS increases operational intelligence and orchestrates people, technology and processes to help manage everyday operations, as well as incidents, within complex environments.

Powered by Honeywell's Enterprise Buildings Integrator core platform, CCS integrates information from all your essential subsystems – including security, fire, life safety, energy and others, as well as edge devices – and presents aggregated information through an intuitive graphical user interface.

At a glance, your security operators have real-time situational awareness across your facility and can respond rapidly to incidents using prescribed workflows based on your Standard Operating Procedures (SOPs).

**INCIDENT

## AN EXCEPTIONAL USER EXPERIENCE

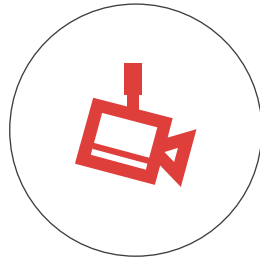

CCS presents data from all subsystems in a unified graphical user interface, providing security operators with extraordinary situational awareness, critical control and coordinated response.

# AN ECOSYSTEM OF INTEGRATED APPLICATIONS

Our technology platform is built on open industry standards, enabling the development of specialized applications and seamless integration with edge devices and third-party solutions. It integrates with more than 600 solutions for critical environments, empowering facilities to adopt best-in-class technology while ensuring seamless interoperability. And rest assured these solutions – from both Honeywell and specialist providers – are designed to address the unique physical and cybersecurity challenges you face.

# CCS SOLUTION SUITE

Command and Control Your Facility with Confidence

## COMMAND CONSOLE

### 24/7 Control Room Operations

- Maintain improved situational awareness across facilities.
- Prioritize and manage incident response, and get access to integrated systems with detailed system information and documentation.

## COMMAND WALL

### Collaboration and Incident Response

- Better coordinate incident responses such as evacuations.
- Simplify the reprioritization and redirection of critical tasks, as well as management of daily tasks.

## COMMAND STATION

### For Mobile Operations or Periodic Desktop Use

- Get an overview of what's happening onsite, virtually anytime and anywhere.
- Ideal solution for coordinating maintenance tasks and deploying staff, and for technicians onsite.

## EASTERN GOLDFIELDS REGIONAL PRISON MAXIMIZES SECURITY WITH HONEYWELL

Integrated security management platform connects

**1,500**

monitored security points

**64** doors

**360** CCTV cameras

**70** cell intercoms and

**120** door intercoms for efficient, secure operations

**OBS analytics** for site-wide monitoring of building controls and mechanical and security systems

**Seamless campus control** and real-time operational transparency for increased productivity

On our six-month budget review, the power costs were lower by 31% for the first time. I attribute this to the work that has been done and to the fine-tuning of the OBS data.”

— Brian Pegram  
Contract Administrator  
Department of Justice

# COMMAND BETTER CARE OUTCOMES

## TECHNOLOGIES FOR PRISONER EDUCATION AND REHABILITATION

Around the world, rates of recidivism are sobering, with more than half of inmates returning to prison within five years. Honeywell Secure PC is designed to help tackle this challenge. This prisoner interactive learning system lets inmates securely access authorized TV services and e-learning content in their cells or a supervised environment, helping further their education and prepare them for re-entry into society. And our ability to integrate with Prisoner Movement and Identification Systems and Prisoner Services Kiosks helps to normalize the prisoner environment and reduce custodial staff workload.

# COMMAND BETTER LIFECYCLE AND EFFICIENCY OUTCOMES

## OPTIMIZE YOUR ASSETS AND RESOURCES WITH A LIFECYCLE BUSINESS PARTNER

Prisons are enormous facilities, with extensive technology needed to power operations. Unfortunately, that technology suffers from continual budgeting shortfalls and insufficient staff to manage it.

Honeywell's ability to provide two core functions – technology provider and facility asset manager – ensures that your total lifecycle risk and costs are efficiently managed with no surprises, from design, through installation and ongoing maintenance, upgrades and support. We focus holistically on your facility through services, delivered directly by Honeywell or authorized partners, that help reduce your lifecycle costs and enhance resource efficiency.

Performance and outcome-based technical support and maintenance services

Strong third-party vendor relationships for best-in-breed applications and seamless integration

Total Asset Management (TAM) contracts

Energy performance contracting

24x7 emergency callout service with experienced local technical teams

HUDSON COUNTY  
CORRECTIONAL  
CENTER MODERNIZES  
FACILITIES – AND  
SAVES BIG – WITH  
HONEYWELL

**30%**

reduction in  
annual energy use

**4.05 m kW**

drop in electricity  
consumption

**\$1.7 m**

savings annually

We are so pleased with this project – it truly is a win-win – creating more energy efficiency and reducing cost of operation long term. Honeywell helped us map out an excellent path for change.”

— Tom DeGise  
Hudson County Executive

# WHY HONEYWELL?

 <p><b>ENHANCED SAFETY</b> and security</p>	 <p><b>10-30%</b> reduction in <b>energy costs</b></p>	 <p><b>10-15%</b> lower <b>lifecycle costs</b></p>	 <p><b>SOLUTIONS AND SERVICES</b> to help reduce recidivism</p>
 <p><b>REDUCTION OF ONE FULL-TIME EMPLOYEE</b> in control room*</p>	 <p><b>LOWER STAFF TURNOVER</b> due to faster training and upskilling</p>		
 <p><b>UNRIVALLED DOMAIN EXPERTISE</b> 30+ years Global and local reporting Technicians &amp; software engineers around the globe</p>	 <p><b>75+</b> Justice &amp; Correctional facilities globally</p>	 <p><b>5,000+</b> Critical infrastructure locations benefit from Honeywell's industrial cybersecurity solutions</p>	
	 <p><b>PROVEN INTEGRATION PLATFORM</b> provider for critical infrastructure</p>	 <p><b>REDUCE RISK</b> Holistic approach to critical asset management, reducing risks and costs</p>	

\* If moving from unintegrated point solutions to Honeywell PSIM.

Results are not necessarily typical and are based on Honeywell "before and after" analysis at selected customer sites. Such analysis compared site performance before deployment of Honeywell solutions to post-deployment performance, without controlling for other factors that may have affected results. Your results may vary.
