

IS YOUR HOSPITAL READY FOR THE NEW NORMAL?

Reassuring patients, staff, and visitors that your healthcare environment is ready for the new normal requires evolution – to ensure your safety, security and compliance systems can adhere to new standards and policies. Yet that doesn't mean you need to compromise sustainability, productivity or operational efficiency.

HEALTHY BUILDINGS INTRODUCTION – HEALTHCARE

Honeywell

WHAT'S YOUR HEALTHY BUILDINGS SCORE?

Is your healthcare facility cleaner, safer,
and ready to operate in the new normal?

Are your staff, patients, and visitors following
the latest guidelines to mitigate risk?

Healthcare spaces are dynamic: Busy, mixed-use facilities ranging from clinical environments and emergency departments to public and support-service areas.

It can be challenging to manage the flow of patients, staff, and visitors throughout these spaces while also optimizing care and maintaining a comforting, welcoming environment. These challenges are further compounded by the need to keep facilities healthy and safe, and adhere to shifting policies and standards.

Adapting to this new normal requires an evolution in operational intelligence, control, and stakeholder engagement – to keep people safer while also keeping healthcare environments productive.

Our Healthy Buildings solutions help you create reassurance throughout your facilities and operations as you navigate the inherent uncertainties of a return-ready strategy.

Our approach focuses on integrating unobtrusive technologies – such as building controls, sensors, security access, artificial intelligence, and analytics – to protect the health and safety of patients, staff, and visitors.

FLEXIBLE SOLUTIONS FOR A DYNAMIC HEALTHCARE ENVIRONMENT

A healthier building goes beyond energy efficiency to improve the well-being, confidence and productivity of the people who use it. Honeywell can help you assess the health of all your facilities and the most cost-effective ways to improve them, as well as reassure patients, staff, and visitors with additional safety protocols and access to face masks.

There's no one solution for a return-ready strategy. Our scalable and configurable packages are specifically designed responses from the global leader in personal protection equipment (PPE), advanced building controls, services, and IoT analytics.

INDOOR AIR QUALITY

- Manage air flow and filtration
- Optimize ventilation
- Air cleaning and disinfection
- Control temperature
- Balance humidity
- Control and change room pressurization
- Room state flexibility

HEALTH, SAFETY AND RISK MITIGATION

- Provide PPE protection
- Prepacked, resealable PPE kits
- Enable sanitization tracking
- Count and monitor people flow
- Preventive screening with thermal cameras
- Secure access by status
- Provide "no-touch" access
- Monitor social distancing
- Use analytics for contact tracing
- Detect mask and PPE compliance

BUSINESS CONTINUITY AND COMPLIANCE ANALYTICS

- Healthy Buildings Score dashboards and mobile app
- Real-time alerts, lockdown monitoring and trend reporting
- Proactive occupant and visitor communication
- Remote monitoring for full business continuity
- Optimize operational throughput of OR, ER and DI departments
- Cybersecurity for operational technology (OT)

SUSTAINABILITY AND OPEX REDUCTION

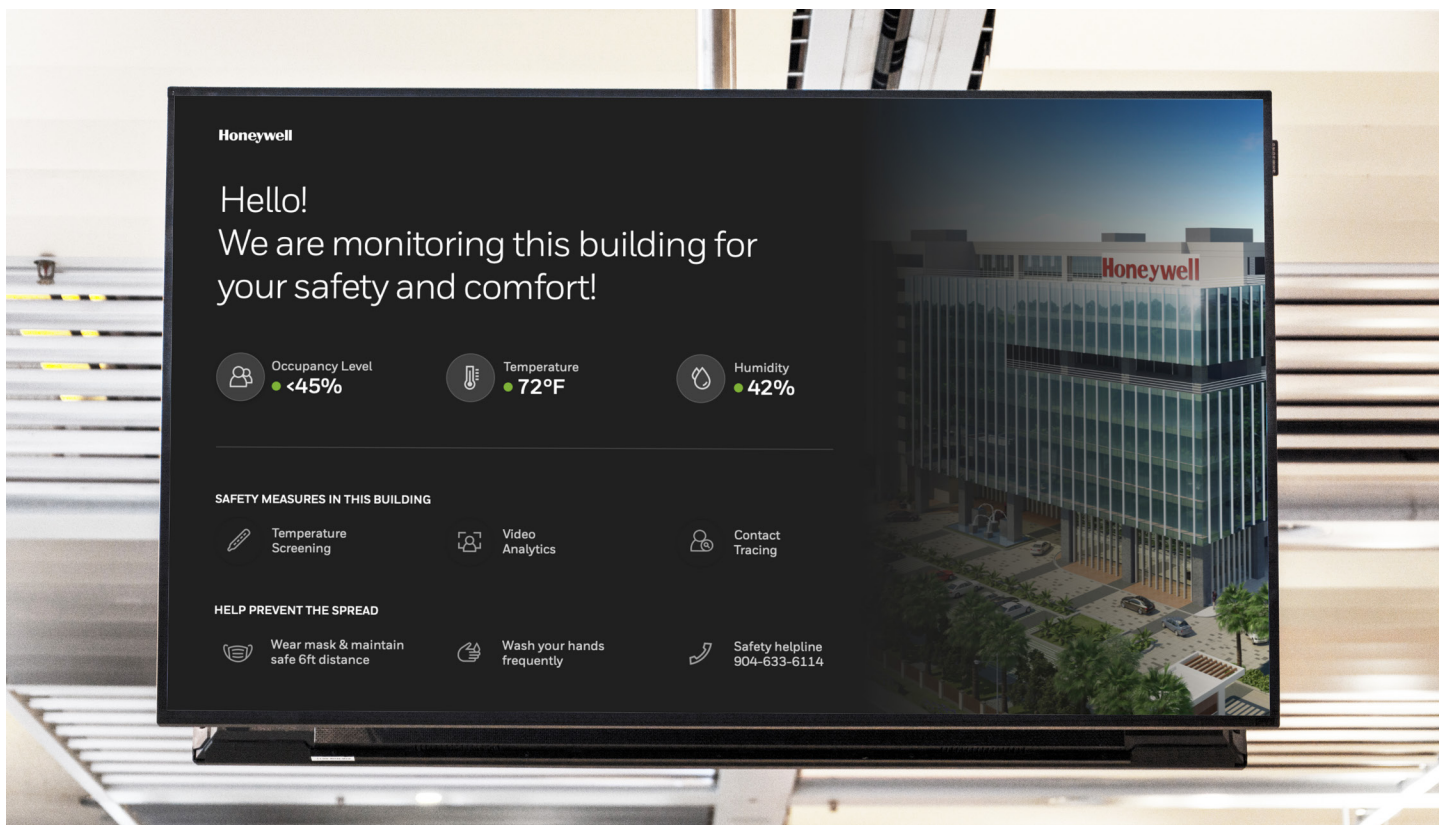

- Cloud-based solutions powered by machine learning and AI to optimize energy consumption and asset optimization
- HVAC tuning and retrofits
- Lighting retrofits
- Energy performance contracting and other cost savings metrics
- Flexible financing solutions to accelerate your return-ready strategy

EMBRACE THE NEW NORMAL

Healthier buildings offer benefits that go beyond the immediate concerns of mitigating risks to patients, staff and visitors.

Healthier buildings also improve the patient experience. They provide a focused environment for quality care while still meeting sustainability and energy goals. They can give tangible evidence of why people can return to your facilities with confidence, with reassurances to attract new clinicians and patients.

We live in a new normal – meaning now is the time to show that your healthcare facilities are safer and more responsive, today, and tomorrow.
